

## **CSI tools is in the 2020 KuppingerCole's Leadership Compass for Access control tools for SAP environments**

Herent, July 27<sup>th</sup>, 2020. CSI tools is a solution provider for SAP access governance solutions. By providing insight into real SAP vulnerabilities and delivering solutions to improve the risk and security posture of the organization's SAP environment.

CSI tools provides analytic control solutions that audit and monitor SAP environments, manage and validate authorizations, enables compliant user provisioning and build roles automatically (also via reverse engineering) tuned to the organizations security requirements and business needs.

KuppingerCole is a top European global Analyst Company focusing on Information Security and Identity and Access Management (IAM). In its May 2020 Leadership Compass of the KuppingerCole Report, analyst Martin Kuppinger examined the market segment, delivery models, required capabilities to providing solutions that increase security in SAP environments by restricting access.

By adding the right Access Control components to their SAP infrastructure, organizations can significantly improve enterprise risk management and corporate compliance with applicable laws and regulations. KuppingerCole has included CSI tools in their leadership compass "Access Control for SAP Environments".

CSI tools has been granted a position in the Access Control leadership compass, where the analysts specifically looked at the functional strength and completeness of our CSI tools GRC suite (CSI Authorization Auditor, CSI Role Build & Manage, CSI Emergency Request and CSI Automated Request Engine).

"CSI tools provides a solution for managing access controls and user access in SAP environments that is targeted at the key requirements. It is easy to install and can be quickly used for both audits and continuous management of authorizations in the traditional SAP environments, as well as for S/4HANA." Martin Kuppinger, KuppingerCole.

"CSI tools gives her customers guidance to simplify the complexity of SAP security with a unique approach. CSI tools promotes analyzing, reporting and remediation on the real risks and vulnerabilities for access governance in SAP and delivers complete solutions for this. We are very happy and proud that KuppingerCole recognizes our unique features and effective approach. We can continue spreading the word and help organizations with their SAP access governance"- Johan Hermans, CEO CSI tools
