

## CSI tools listed in KuppingerCole's 2022 Leadership Compass Access for Control Solutions for SAP and other Business Applications

Herent, February 24<sup>th</sup>, 2021. CSI tools is a solution provider for SAP access governance solutions. By providing insight into real SAP vulnerabilities and delivering solutions to improve the risk and security posture of the organization's SAP environment.

CSI tools provides analytic control solutions that audit and monitor SAP environments, manage and validate authorizations, enables compliant user provisioning and build roles automatically (also via reverse engineering) tuned to the organizations security requirements and business needs.

KuppingerCole is a top European global Analyst Company focusing on Information Security and Identity and Access Management (IAM). In its 2022 Leadership Compass of the KuppingerCole Report, analyst Martin Kuppinger examined solutions that support managing access controls specifically for SAP environments and other vendor's business applications or LoBs (Line of Business applications). Although there are many other systems in place which contain critical information as well, many businesses still rely on the availability of well-designed and well-protected SAP Systems. Traditionally, SAP systems are a major focus area for internal and external auditors. For the successful implementation of adequate controls, it is essential that all existing SAP systems are covered by an effective solution for managing risks, and within that for managing access control and SoD controls and implementing adequate Access Governance.

By adding the right Access Control components to their SAP infrastructure, organizations can significantly improve enterprise risk management and corporate compliance with applicable laws and regulations. KuppingerCole has included CSI tools in their leadership compass "Access Control for SAP Environments". CSI tools has been entitled as product leader and innovation leader in the report.

“CSI tools comes with an efficient, modern architecture and rapid deployment of new releases. Beyond that, CSI tools has converged various of the former components into a smaller set of solutions, which again are tightly integrated. In sum, CSI tools delivers a modern, efficient solution approach on managing access controls and SoD rules for SAP environments, with a strong and modern user experience.” - **Martin Kuppinger, KuppingerCole.**

“CSI tools gives her customers guidance to simplify the complexity of SAP security with a unique approach. CSI tools promotes analyzing, reporting and remediation on the real risks and vulnerabilities for access governance in SAP and delivers complete solutions for this. We are very happy and proud that KuppingerCole recognizes our unique features and effective approach. We can continue spreading the word and help organizations with their SAP access governance.” - **Johan Hermans, CEO, CSI tools.**
